Phytocontrol Group expands in Europe

Nîmes, 15.05.2018. Phytocontrol, the Nîmes laboratory specialised in water and food safety continues its European expansion in England and Italy.

Opening of 2 offices in the United Kingdom and Italy...

Phytocontrol is respectively established in London and Milan in these 2 countries. The missions of these agencies are to install and deploy Phytocontrol's commercial offer in these new territories. All of the group's agencies play a commercial, technical and logistical role. The central laboratory is responsible for analytical production and R&D investments. Phytocontrol was able to benefit from financial support from the Occitanie Region for its development in Italy and from BPIfrance for the United Kingdom. Starting this year, these agencies are participating in 4 trade shows to initiate the deployment of the group's analytical services. The United Kingdom and Italy are thus the 3rd and 4th European countries covered by the Phytocontrol group.

... after the consolidation of Belgium and Spain

Established in Belgium and Spain for several years, the Phytocontrol group has already successfully launched itself internationally. The recent subsidiaries Phytocontrol Analytics Belgium and Phytocontrol Analytics España were created to formalise the group's activity in these territories and strengthen its proximity to customers and their needs.

"These two new branches strengthen our presence in northern and southern Europe and illustrate our desire to deploy our services as close as possible to our customers. We are now leading an accelerated development dynamic internationally, with growth in excess of 50% in these markets", comments Pierre Bourliès, Marketing Director of Phytocontrol Group.

About Phytocontrol Group

Nîmes - Paris - Lyon - Marseille - Vannes - Toulouse - Bordeaux - Metz
Barcelone - Alicante - Bruxelles - Milan - Londres

Phytocontrol, a private and independent French laboratory group, created in 2006 in Nîmes, is an expert in the analysis of contaminants in water and food. Its activities are divided into 3 departments: AgriFood (agri-food analyses), Hydro (water safety) and Biopharma (Good Laboratory Practice studies). The laboratory, which covers 4000 m² and houses a state-of-the-art ISO 14001 technical platform, is accredited on all test programs developed, GLP certified and approved by the Ministry of Health. Currently, the group has 13 branches in France, Belgium, Spain, England and Italy; it employs 250 people and has a turnover of 16.5M€ supported by an annual growth of over 25%.
